

**Bespoke
Steel Door
Manufacturer.**

THE STRONGDOR DIFFERENCE.

At Strongdor, quality drives everything we do. Our skilled team operates across 4 Lancashire-based sites, providing over 69,000 sq ft of facilities dedicated to manufacturing, innovation, distribution and customer support. Working seamlessly together, our sites enable us to deliver high-quality bespoke steel doors while providing expert support at every stage of your Strongdor journey.

Terry James
Managing Director

“ We pride ourselves in our mission of ‘making life easier for the installer’ and we are committed to delivering excellence, by providing the very best service, the very best product and most of all, happy customers. By ensuring the little details are just right, we can make life easier for you! ”

BESPOKE STEEL DOORS

Easy-to-fit, versatile steel doors that offer fantastic value for money. Developed to be adaptable, they can be used in a range of projects and settings with U-value options as low as 1.5 W/m²K, ensuring your door-set is practical as well as secure.

To make life easier for the installer, they are manufactured from corrosion-resistant steel, complete with powder coating and up to a max height of 2.9 metres high!

MAKING YOUR LIFE EASIER!

Short Lead Times.

When you are up against the clock and need a steel door, we have you covered with fast lead times for your business.

1

Made in Britain.

As an accredited member of Made in Britain, we strive to provide British made products of outstanding quality to our customers.

2

Fast Quotes.

Quick pricing gives your project a competitive advantage.

We know deadlines can be tight, so a quick turnaround is essential.

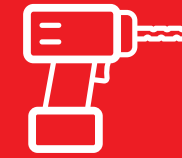

3

Steel Door Experts.

Get access to our expert sales team who hold key insights into the practicalities of steel doors, saving you time and money.

4

Simplified Installation.

Our doors are designed for straightforward installation, with adjustable frames, clear guidance and practical features that help installers work efficiently onsite.

5

Technical Support.

From specification through installation, our team is on hand with practical advice and dependable support to help keep your project moving.

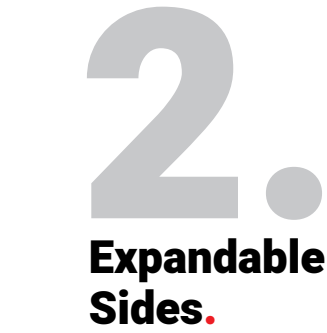

6

DOOR USP^s.

Dog Bolt Hinges.

All our hinges are dog bolt as standard. This design ensures that even if someone cuts off the hinge barrel from the outside during an attack, the door remains securely in place and cannot be pushed out of its frame. The dog bolt provides this added security, significantly enhancing the door's overall protection.

Expandable Sides.

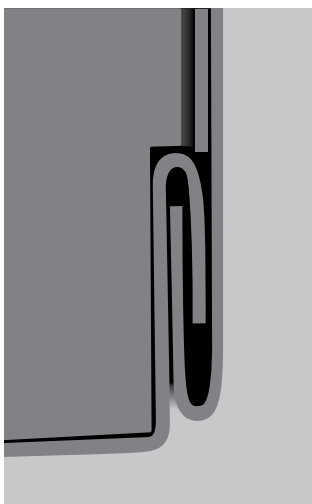

This feature ensures a tidy and neat fit, allowing for a secure installation even if the opening is not perfectly square.

The sides can be adjusted up to 12mm at each side as needed, providing flexibility for an accurate fit.

6mm Welded Plate for Jacking Screws.

Our 6mm welded plate significantly enhances both strength and security, providing formidable protection against even the most determined attempts at forced entry. This heavy-duty construction ensures long-lasting durability, making our steel doors a top choice for high-security applications.

Mechanical Interlock.

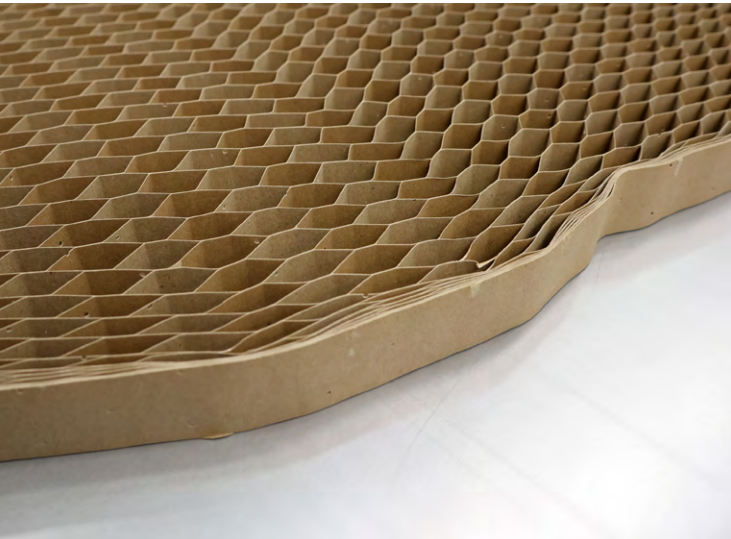

Our mechanical interlock is integrated into all our doors and significantly enhances their strength.

This feature creates an exceptionally sturdy door leaf that resists bending and flexing, ensuring durability and reliability.

Glue and Unbacked Honeycomb.

Our cardboard honeycomb core is an open construction, allowing the glue to expand and fill the hexagonal cells through the whole door. This results in the two leaf skins being bonded at multiple points, significantly reducing the risk of separation and delamination.

Fixing kit.

All our doors are supplied with a bespoke fixing kit, complete with a full-length metal hex bar, extra caps and a new drill bit. This comprehensive kit, available in 4 options of masonry, brick, timber and steel, provides everything you need for a simple install on site.

WHAT OUR CUSTOMERS ARE SAYING?

NT Nigel Tomlinson

★★★★★ ✓ Verified

The company returns quotes very quickly, always ready to talk and answer queries and the deliveries to site are exactly what they say and the time and date never moves, this help with our turnover.

AJ AB Joinery & Building Ltd

★★★★★ ✓ Verified

This company is 2nd to none. The initial order process was easy, great advice and communication from Elliott. I was well impressed!

TF Technical Facilities Luke

★★★★★ ✓ Verified

Great service from the start, had a lot to get through, Lauren was really helpful on the phone, we had changes to make back and forth with the client, delivery was brilliant all labelled to specific locations as requested and well packaged.

CH Chris Haw

★★★★★ ✓ Verified

Very good experience dealing with Strongdor. Elliot was informative, prompt and handled my enquiry with expert knowledge. Having not ordered this type of door before, he made the process as easy as it could be. Highly recommend.

CB Commander Building Services

★★★★★ ✓ Verified

Strongdor are efficient, really helpful, showed a depth of knowledge about their product and are respectfully priced for the product they offer.

CB Chris Blackmore

★★★★★ ✓ Verified

From getting a quotation to the order and delivery process was seamless. Great staff who are always willing to help and the product is by far the best in the industry.

The Arc London.

CASE STUDIES.

Nestled among the towering high-rises of London's Shoreditch, The Arc is a striking example of modern urban living.

This innovative mixed-use development, just a short tube ride from the city centre, features 100 sustainable homes and has already earned four international property awards. Developed by Ghelamco, a family-run European real estate group, it brings together acclaimed architects and leading London interior design experts. With aesthetics and safety at its core, The Arc required doors to meet varied specifications and styles. Strongdor supplied a range of solutions, including three fire-rated doors for the distinctive lobby area, designed to blend seamlessly with the space.

Firedor®

FEATURED IN THIS FACILITY

- ✓ Fire-rated steel doors combining safety with sleek design.
- ✓ PAS 24 security doors securing basement storage areas.
- ✓ Custom bronze rooftop exit door blending with architecture.
- ✓ Bespoke door solutions meeting style and performance needs.

Elizabeth Woodville School.

CASE STUDIES.

Working closely with the school, Strongdor delivered durable, practical door solutions, finished in RAL 5010 Gentian Blue to match the school's colours. The result is a modern, cohesive look across the campus.

Installed by JP Fire Solutions, the project included double louvred doors for plant and bin stores, providing essential ventilation while keeping areas secure. In communal spaces, single doors with long vision panels improved light and accessibility, while classroom fire exits featured push-bar mechanisms for safe, easy emergency escape.

Steeldor®

FEATURED IN THIS FACILITY

- ✓ Steel doors colour-matched to RAL 5010 for cohesive school branding.
- ✓ Louvred door-sets providing secure ventilation for plant and bin stores.
- ✓ Vision-panel doors enhancing visibility and Part M accessibility.
- ✓ Certified fire exits with push-bar hardware for safe emergency egress.
