### Simplex 8100

The Dorma Simplex Mechanical Pushbutton Lock offers a keyless solution, eliminating the challenges and expenses of managing keys and access cards. The Simplex 8100 model features a durable pushbutton design with mortise locking options and a lever handle, providing secure exterior access via a user-set combination while allowing free egress for convenience and safety.

#### Features

- Mechanical pushbutton lock eliminates key and card management hassles. Provides combination access with free egress.
- Fully mechanical design removes battery replacement costs.
- Single, easy-to-manage access code for all users.
- Keypad programming without removing the lock.
- Factory-handed; not field reversible.

#### Operation Modes

- Pushbutton Access - Standard combination entry.
- Passage (select models) - Allows free access when activated from inside.
- Deadbolt (select models) - 1" deadbolt for added security, accessible via combination or key override.
- Lockout (all models) - Disables entry codes from inside; access only via key override.
