Dorma GSR Door Co-ordinator

IMPORTANT

Please note, that this hardware will not be supplied on the door-set by Strongdor. This will need to be installed by the customer and cut to size to suit.

Crafted for seamless integration with Dorma TS93 Slide arm closers, the GSR door coordinator unites the pair of closers on a double door, ensuring synchronised operation for a proper sequential closure.

This sleek premium product not only elevates any door-set, but serves as a valuable facilitator for multiple projects and applications.

FEATURES

Suitable for internal and external use.

Available with fire rated door-sets.

Sleek and elegant installation with the moving parts concealed.

Consists of both the slide arms and door co-ordinator combined.

Increased safety feature ensuring double doors close in correct sequence to maintain fire compliance.

Available as mechanically operated or electromagnetic hold open functionality.

Electromagnetic on the pull side available in 2 size:
1220 - 1350 - 2500mm
