MICO High Security Extended Tower Bolt

Engineered to enhance high-security locking systems, MICO Tower Bolts offer added protection through strong stainless steel construction. Designed for strength, corrosion resistance, and compatibility for steel doorsets.

Features

- All stainless steel with a brushed finish for long-lasting performance.
- Ideal for taller or custom doorsets.
- Tested with select doorsets up to LPS 1175.
- Designed to withstand cutting, levering, and ramming attacks.
- Sliding bolt with turn-handle locks into a secure housing, suitable for internal or external use.
