MICO Tower Bolts

Engineered to enhance high-security locking systems, MICO Tower Bolts offer added protection through strong stainless steel construction. Designed for strength, corrosion resistance, and compatibility for steel doorsets.

MICO MSTB (Medium Duty Tower Bolt)

* Available in both lengths.

MICO HSTB (Heavy Duty Tower Bolt)

* Only available in the shorter length.

Features

- All stainless steel with a brushed finish for long-lasting performance.
 - Ideal for taller or custom doorsets.
- Please note:** the extended version is currently only available on the MSTB option.
- Tested to LPS 1175 B3.
 - Designed to withstand cutting, levering, and ramming attacks.
 - Sliding bolt with turn-handle locks into a secure housing, suitable for internal or external use.

MICO MSTB Benefits

- Available with fire and security rating!

MICO HSTB Benefits

- Heavy-duty.
- Pad lockable for extra security.
- Available with fire and security rating!
