### Record DFA 127 Door Operator

The Record DFA 127 is a versatile drive system designed for automating swing doors. To enhance compatibility, we've engineered Strongdor door-sets to work seamlessly with this hardware, allowing us to supply doors pre-prepped and ready for installation.

#### Features

- Operates as a fully automatic door or holds the door open, releasing it to close when the fire alarm is triggered.
- Available as fire-rated.
- Adjustable spring force accommodates various door sizes.
- Offers FULL POWER mode for heavy doors and LOW ENERGY mode for slower-moving traffic.
- Compact, sleek design complements any building style.
- Silent operation, ideal for noise-sensitive environments like offices or hospitals.
- Durable and reliable, with easier maintenance and servicing.
- Approved for use as a hold-open system for fire protection barriers.

**Please note:** The parts are not supplied or installed by us, we just provide the door prepped for the operator - it is the responsibility of the customer to arrange supply and fitment by an accredited Record installer.
