Salto XS4 Locks

These advanced access control locks are card or phone-operated and feature a lever handle that integrates seamlessly with various locking mechanisms. Battery-powered and designed for secure access, the lever unlocks when scanned, allowing free operation. In its locked state, the lever remains stationary, ensuring fail-secure functionality.

Available in 2 models:

XS4 Original: Features a larger faceplate with the option to integrate a cylinder.

XS4 Mini: Compact design that covers only the lever for a streamlined look.

Ideal for environments requiring individual room access, such as hotels and offices, where the fob access is directly on the handle, eliminating the need for a separate control box.

XS4 Salto Original Lock

Features

- Clutch mechanism escutcheon; when unlocked handle moves freely.
- Handle rotation: 33°.
- Distance from the handle to the cylinder: 47 mm to 110 mm.
- Non fire-rated.

XS4 Mini Salto Lock

Features

- Clutch mechanism escutcheon; when unlocked handle moves freely.
- Handle rotation: 45°.
- Initial max. 4° pre-turn. SALTO recommends the use of a mortise lock with a maximum 4° pre-turn.
- Non fire-rated.
