

Admiral's Quay.

The Admiral Quay development comprises of eight high-rise residential blocks offering exceptional views from a prime location.

The development contains 520 apartments and restaurant units with associated car parking for 474 cars.

An interesting project which combines external steel entry doors, louvre doors and car park access, Admiral's Quay is an excellent example of the range and breadth of steel door types offered by Strongdor.

Finished in RAL 7016 - Anthracite grey, the steel doors offer a subtle yet high quality finish to the car park and external areas. Alongside utilising the Strongdor Louvre doors to ensure both security and airflow are maintained.

Steeldor®
