

The Arc London.

Nestled within the towering high rises of London's Shoreditch, The Arc stands as a testament to modern urban living.

This innovative, mixed-use development, located just a short tube ride from the city centre, boasts 100 sustainable homes and is already award winning with four international property awards.

Developed by Ghelamco, a prominent family-run European real estate group, The Arc London is a collaboration of some of the world's most acclaimed architects and London's leading interior design experts.

The Arc's design prioritises both aesthetics and safety. To meet the project's diverse requirements, Strongdor provided an range of doors with varying specifications and styles.

Starting with the striking designed lobby area, Strongdor supplied 3 fire-rated doors that seamlessly blend with the space's distinctive style.

STRONGDOR

Firedor®

FEATURED IN THIS FACILITY

Fire-rated steel doors combining safety with sleek design.

PAS 24 security doors securing basement storage areas.

Custom bronze rooftop exit door blending with architecture.

Bespoke door solutions meeting style and performance needs.

CASE STUDIES

FIRE RATED STEEL DOORS

A selection of Strongdor's steel doors are installed in the basement of the property, where safety is of utmost importance for bins and bike stores. These fire-rated steel door-sets, enhanced with additional PAS 24 security ratings, provide strong reinforcement for crucial maintenance areas, ensuring the building's overall safety and security.

One of the most remarkable features of The Arc is its rooftop bronze fire-rated exit door. This door is not only functional but also designed to integrate seamlessly with the surrounding walls, achieving a sleek look that enhances the building's modern aesthetic.
