STEELDOR RETAIL APPLICATION

ASDA DUNDEE

CUSTOM MADE STEEL DOORS

Prestige projects demand high quality products that can be delivered on time, to specification and within budget. Strongdor worked with both the architects and contractor on this project for a large national retailer, to guarantee that the chosen doorsets worked as required.

In this case, Steeldor offered a range of doors that could be used for both the main store's oversize double emergency exit doors and for the high traffic staff entrance personnel door. Resilience, security and aesthetics were equally important factors for the architects in the selection process, while the contractor

was pleased that the doors did not delay construction and were simple to install.
