FIREDOR COMMERCIAL APPLICATION

MINERVA HOUSE

FOUR HOUR FIRE-RATED STEEL DOORS

Demanding and prestigious, the Minerva House project required doors with both specialist colour effects and fire rating. The specified solution, Strongdor's Firedor series, surpassed those requirements while remaining within budget.

In order to create continuity, and to maintain the aesthetic coherence and tension between the interior and exterior spaces, it was necessary that the doors should be fitted with themed ironmongery.

Subtle and practical, it is precisely this attention to the smallest detail that Strongdor takes a such pride in.

The same amount of emphasis was also placed on the reliability of the product and the high standard of service that Strongdor seek to maintain, to prove themselves as market leaders.
